

THE LITTLE POOL CO.

INSTANT POOLS • TIMELESS STYLE

LUXURY FREE-STANDING FIBREGLASS POOLS

FOUR POPULAR POOL SHELL COLOURS TO CHOOSE FROM

HIGH QUALITY FIBREGLASS INTERIOR

Unlike traditional above ground pools, our Little Pools are designed to last a lifetime. No need to replace or reline the interior surface, just keep your water balanced (no concrete to maintain and no liners to replace).

EQUIPMENT

Our equipment can be placed under the pool or on a separate pad so you can design the best option to suit your backyard.

MINIMAL SITE PREPARATION

Our pools have been specifically engineered to suit almost every site with very little ground work required. All you need is a basic, level concrete pad or platform for the pool to sit on.

EXTERIOR FINISH OPTIONS

Fully or partially clad the exterior of your pool with our exterior finish options.

CHOOSE THE 'NUDE' OPTION IF YOU PLAN TO DECK AROUND YOUR POOL

AUSTRALIAN FIBREGLASS TECHNOLOGY

Made by world-renowned fibreglass pool manufacturer Compass Pools Australia.

COMPOSITE EXOSKELETON

Allows for simple above-ground installation. No wood or steel is used in the structure of the pool so there is no need to worry about rot, termites or rust.

CAN BE INSTALLED PARTIALLY INGROUND

Need your pool to sit a little lower? You can install your pool partially inground to match the existing deck, patio or other raised areas. Make sure you have prepared your concrete base beforehand.

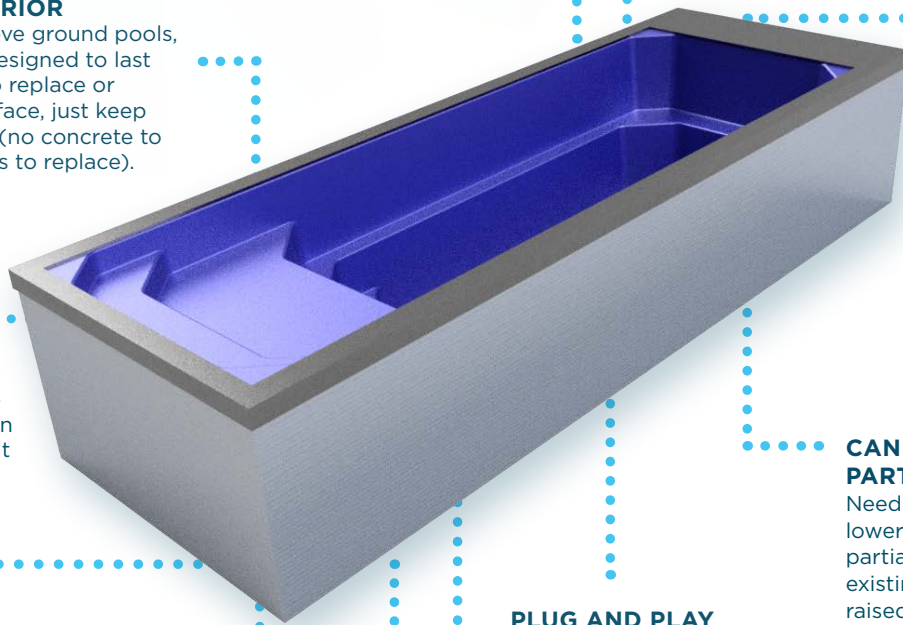

PLUG AND PLAY

Your pool arrives pre-plumbed with required pump, filter and equipment, and is ready to fill and use. All you need to do is arrange a power connection.

SWIM ON THE DAY YOUR POOL ARRIVES!

Your Little Pool comes ready to be filled with water, just make sure you have prepared your concrete base and arranged your power connection.

*Check your local building codes for fencing requirements.

TRANSFORM YOUR BACKYARD

It's never been easier to transform your backyard into a personal oasis...

Click. Prepare. Swim. Yep, that's about as hard as it gets. At The Little Pool Co. we're big on making life simple, which is why we've made it easier than ever before to own a great looking pool without breaking the bank.

With the help of one of Australia's leading pool manufacturers, and the brains of one of the industry's most respected engineers, we've managed to create the ultimate transportable instant fibreglass pool.

The unique non-corrosive composite exoskeleton means that unlike many other fibreglass pools, The Little Pool Co. series can be installed fully above ground. Perfect for smaller sites with limited excavation options.

Say goodbye to lengthy construction projects in your backyard! The Little Pool Co. makes it simple. Pick your favourite pool shape, choose your preferred colour, select your ideal exterior finish, then sit back and get ready to swim.

When your pool arrives you barely need to lift a finger. All you need is a level concrete pad and a certified electrical connection, then simply fill your pool with water and jump in. All councils/local authorities have different rules regarding pool fencing. Check local council regulations in your area.

SWIM THE DAY YOUR POOL ARRIVES!

The lightest free-standing high quality swimming pool. Much cheaper to lift into place than concrete or containers.

CHOOSE YOUR POOL MODEL

RELAX RANGE

MODEL	INTERNAL LxWxH	EXTERNAL (INCL. DECKING & CLADDING) LxWxH
Relax 6	6.0m x 2.03m x 1.36m	6.72m x 2.33m x 1.39m

**If decking boards not required, dimensions will vary. Contact your local The Little Pool Co. dealer for details.*

Variations in length, width and height may occur due to manufacturing tolerances and customer requirements. Allow a tolerance of +/- 1cm from external measurements.

Standard package includes a pump, filter, LED light, salt chlorinator, skimmer box and basic pool maintenance kit.

CHOOSE FROM FOUR POPULAR WATER COLOURS

Colour samples are a guide only. These colours are a digital representation and final colour may vary depending on the pool surroundings and the unique manufacturing process.

CHOOSE YOUR EXTERIOR FINISH

Choose a NUDE pool if you plan to deck around your pool

NUDE (NO CLADDING)

Our composite exoskeleton is engineered to support a cantilever deck resulting in savings in construction costs. This is the perfect option if you are decking around your pool.

COPING BOARDS

Choose to have your pool delivered with damage resistant coping boards to protect your pool from the elements. These boards are a great looking alternative to traditional stone coping covers.

FIBRE CEMENT (FC) SHEETING

If you are planning on tiling your little pool, we can attach FC sheeting to the external frame or coping so tiling can be affixed when the pool is delivered to site.

MINI ORB™

Mini Orb™ corrugated steel panels create a unique exterior finish. Mini Orb™ panels are available in six Colourbond™ colours.

ALUMINIUM COMPOSITE PANELS (ACP)

ACP panels offer a sleek and modern finish. The clean, smooth surface creates a minimalist finish that allows your pool to blend into any poolscape. Available in 4 different colours.

6.3 Relax with optional porthole upgrade and roller cover. Fully cladded with dark grey metallic ACP & finished with coping, fascia and kickboards in Futurewood® Slate Grey.

CUSTOMISE YOUR POOL

Put the final touches on your The Little Pool Co. pool to make it perfect for you. Choose from a range of optional upgrades including external steps, heating, lighting, and water management systems. If you have a unique request, simply call us to create a full custom option.

VARIABLE SPEED PUMPS

Save power with an energy efficient variable speed pump which allows you to draw only the amount of power you need at any given time.

COVERS

Whether you're adding heating or not, a pool cover is a sensible addition to reduce evaporation and keep the leaves out. From bubble covers, to manual roller systems, there's a solution for everyone.

HEATING OPTIONS

Swim all year round, extend your swimming season or just make your current swimming season that much more comfortable by adding an optional heat pump.

ACCESSORIES

Want to personalise your pool? There's a whole bunch of upgrades available including swim-jets for exercise, heating options, spa jets and energy efficient pumps. For a real wow factor, why not include acrylic porthole windows in your pool wall?

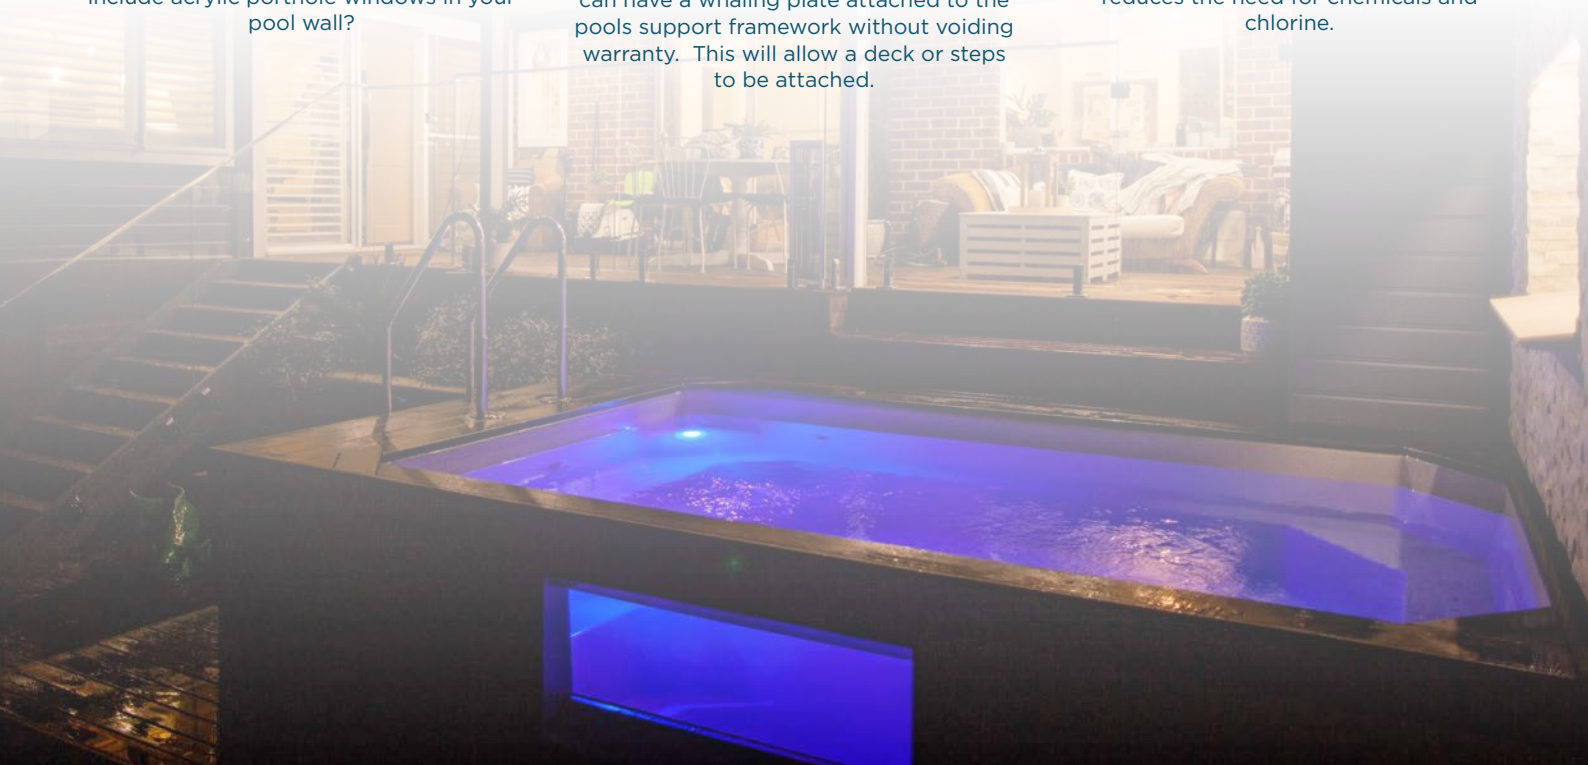

DECK/EXTERNAL STEP INTEGRATION

Will you be placing your pool level with an existing deck, new deck or having it as a stand alone feature? Whichever way, the patented self-supported pool can have a whaling plate attached to the pools support framework without voiding warranty. This will allow a deck or steps to be attached.

MINERAL

Experience the benefits of natural ozone purification & 100% Dead Sea minerals in your own pool by upgrading to a Mineral Swim system. Natural ozone purification combined with Dead Sea minerals greatly reduces the need for chemicals and chlorine.

PREPARING FOR YOUR POOL DELIVERY

IT'S NEVER BEEN EASIER TO TURN YOUR BACKYARD INTO A PERSONAL OASIS.

We have a growing number of full-service resellers across the country who will ensure a smooth delivery of your pool, or you can choose to organise everything yourself.

CERTIFICATION AND FENCING

All Councils/local authorities have different rules regarding building projects and pool fencing. It is important that you check with your local authority about your requirements. Your Little Pool comes complete with extensive engineering drawings to assist when dealing with Councils or private certifiers. Some regions require independent fencing for above-ground pools.

FREIGHT AND CRANE

Most of our Little Pools have been designed to fit perfectly on standard-width trucks, which makes them simple and cost-effective to transport. Due to each customer living in a different location, we do not offer freight-inclusive pricing. In most cases, a crane will be required to unload and place the pool in its final position. With our exclusive all-composite construction, they are easier and more cost effective to manage than other heavier options.

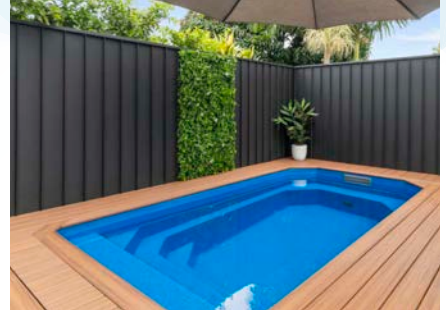

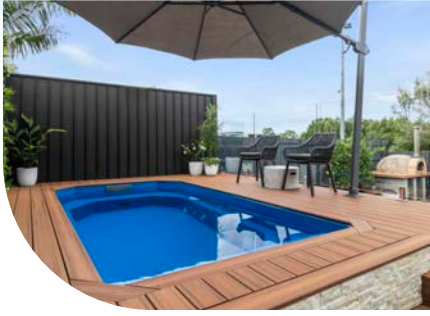

GROUND PREPARATION

Each pool is designed to sit on a basic, level concrete slab. This ensures that the weight of the pool and the exoskeleton are evenly supported, which is an installation requirement. The concrete slab should be a minimum of 110mm thick, poured on plastic sheeting and reinforced with SL62 mesh. Control joints are not required and there should be no fall on the slab.

ELECTRICAL REQUIREMENTS

You will need to engage a licensed electrical contractor for connection of your pool. The contractor will need to understand Section 6 of the Wiring Rules, and be familiar with equipotential bonding of swimming pools and spa pools as per the Australian Standard Electrical Installations - Wiring Rules (AS3000).
